

DHIRAJ KUMAR YADAV

New Delhi, India | +91-9852224072 | ydhiraj811@gmail.com | linkedin.com/in/ydhiraj811 | github.com/ydhiraj811

PROFESSIONAL SUMMARY

Software Engineer with experience building backend APIs in Python and Node.js, AWS cloud services, and distributed monitoring systems. Technical lead for a 7-person test automation team, with production ownership from API design through deployment. Interested in scalable infrastructure and distributed systems.

TECHNICAL SKILLS

Cloud & Backend: AWS (Lambda, API Gateway, DynamoDB, S3, IAM, CloudWatch), Node.js, Express.js, Python (Flask/Django/FastAPI), REST API Design

Core CS Fundamentals: Data Structures & Algorithms, System Design

Languages: JavaScript, TypeScript, Python, Java

Frontend: React.js, TypeScript, Tailwind CSS, Responsive UI Design

Data: MongoDB, Mongoose, Schema Design, CRUD Operations

Engineering Practice: Test Automation, CI/CD, Git, Code Review, Root-Cause Debugging, Technical Leadership

PROFESSIONAL EXPERIENCE

Software Engineer | Tata Consultancy Services

August 2024 – Present

- Built and own 10+ REST API endpoints in Python (Flask/Django/FastAPI) for the client platform, covering data-serving, data transformation, and third-party service integrations, as a workstream separate from automation responsibilities.
- Designed and shipped a new user-facing feature on the client platform end-to-end through these Python APIs, taking it from API design to production.
- Identified and resolved a performance/reliability issue in production Python services before it impacted customers, through proactive debugging and code review.
- Serve as technical lead for a 7-person test automation team: assign work, review automation scripts, and set technical direction for the team's testing approach.
- Built reusable UI components and backend services that improved operational visibility into distributed monitoring systems across staging and production.
- Built automation frameworks and RESTful API validation suites that reduced manual QA effort and strengthened test coverage on enterprise web applications, while leading root-cause analysis on production incidents.
- Integrated authentication/authorization mechanisms across REST APIs with security engineering teams, and led 10+ design and code review cycles documenting architectural decisions.

PROJECTS

Developer Portfolio with AI Chatbot & Admin Dashboard | Personal Project

- Built a full-stack portfolio site (React, TypeScript, Node.js, Express, MongoDB) with a dynamic blog system, project showcase, and JWT-authenticated admin dashboard for managing blogs, projects, and messages.
- Integrated the Google Gemini API to power a context-aware AI chatbot widget for visitor Q&A, styled with Tailwind CSS and Framer Motion.

Real-Time Chat Application | Personal Project

- Built a full-stack real-time chat app using the MERN stack with Socket.io for live messaging and online-status updates.
- Implemented JWT-based authentication/authorization and global state management with Zustand.
- Handled error states on both client and server, and deployed the app end-to-end (frontend, backend, MongoDB Atlas).

Leave On Time – Leave Management System | 2024

- Architected and developed a full-stack leave management platform using React.js, Node.js, Express.js, and MongoDB supporting role-based access control, workflow automation, and scalable RESTful APIs.
- Built 10+ UI components including login, leave apply/approval workflows, notifications, and skill/TA mapping modules, improving leave transparency and operational efficiency.
- Designed RESTful APIs and MongoDB schemas for multi-role access control, backup mapping, and course-to-skillset alignment across the organization.

LawSathi – Legal Advisory Platform | Personal Project | 2023

- Developed a full-stack legal advisory platform (React.js, Node.js, Express.js, MongoDB) with chatbot-based advisory workflows, CRUD operations, and access controls across 5+ resource types.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Applications (BCA) — Guru Gobind Singh Indraprastha University, New Delhi | May 2024 | CGPA: 8.45/10

AWS Certified Developer – Associate — Amazon Web Services | September 2025
